Key Findings

[HIGH] Missing Required View Functions

Failed to fetch 1 required view function(s): pool_stats. This prevents complete security analysis.

[HIGH] Missing Queue Capability

Neither v24 nor legacy queue views are available. Queue inspection capabilities are missing.

[HIGH] Missing Queue Capability

Neither v24 nor legacy queue views are available. Queue inspection capabilities are missing.

[MEDIUM] Potential Unbounded Loops in Entry Functions

Detected loop-related patterns in bytecode strings. If entry functions iterate over user-controlled vectors without bounds, this may lead to DoS attacks or excessive gas consumption.

SSA (Supra Security Agent) Security Assessment Report

This report provides a risk assessment based on automated security scanning at the time of analysis. SSA (Supra Security Agent) does not provide guarantees, endorsements, or warranties regarding the security of the assessed assets.

Time-of-Scan Limitation: This report reflects the security state at the time of scanning. Security conditions may change over time, and this report does not guarantee future security.

Independent Due Diligence: Users must conduct their own independent security review and due diligence. This report is a tool to assist in security assessment but should not be the sole basis for security decisions.

No Formal Audit: This report is not a formal security audit. It is an automated analysis based on rule-based scanning and should be considered alongside other security measures.
